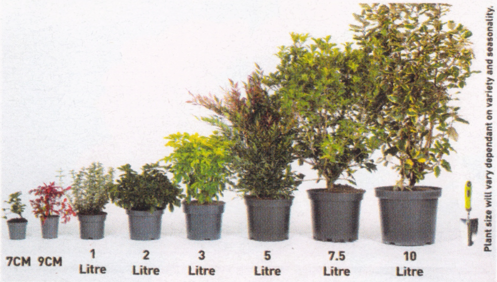
Guide to our regular plant sizes

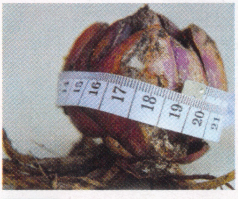
Quality plants and bulbs delivered straight to your door at just the right time for planting.

Continued investment in quality management and packaging means that our quality control process is better than ever. Plants are double and triple checked before they get sent out to you. They also spend less time in the post. With our new packaging, many of our plant parcels can fit straight through your letter box.



Potted plants

These well-established plants are ready to be planted straight out into final positions, as long as the weather allows. Sizes given are usually the diameter of the pot.



Bulbs

We always supply first year flowering-size bulbs.

Bare roots

These are sent in a dormant state without pot or compost. Planted in spring, they produce new growth through the year. Size 1 is the highest spec available irrespective of plant variety or size.

Garden Ready plants:

We despatch these super-size plants at the perfect time for planting out, usually before blooms form, so all the plant's energy has gone into producing a strong root system. This helps them to establish quicker for better growth and then a longer, stronger display of flowers.

Our Garden Ready Plants make gardening as simple as 1, 2, 3...

1. OPEN
Open as soon as they arrive and check them over. Be sure to read and follow the enclosed planting instructions!

2. PLANT
Plant your garden ready plants straight into the garden, containers, or baskets.

3. WATER
Water your plants! Water them when they arrive, then again when you plant them out into their final positions - don't allow them to dry out!

Plug plants:

Each young plant has an extra-strong root system for the best of starts, thanks to our open sided cartridge system. It causes root tips to dehydrate, this is known as 'air-pruning', which encourages the growth of new, lateral fibrous roots, making your plants stronger, more reliable and ready to burst into growth when planted up.
